

Wastewater: Solutions from German-India Partnerships

Khandelwal, S.

Aqua & Waste International GmbH, Hannover, Germany

In this session, we would like to highlight selected collaboration activities and a project case carried out under the umbrella of Indo-German cooperation in the field of water and wastewater. As solid waste and water cannot be treated as two mutually exclusive fields in the Indian context, this session is meant to give an overview of our activities and open the door to potential connection of the two fields on a practical level.
